What to do ?

- In 2016:
 - application for a H2020 grant
 - application for a COST grant
- writing a strategy for the WG
- NUCIS Newsletter

NUCIS Newsletter

- Editor: Merce Rovira (Merce.Rovira@irta.cat)
- Special scientific newspaper for shell fruit species.
- Every article related to this topic is welcomed.
- Merce said „Help to save this newspaper!”
- More details: http://www.iamz.ciheam.org/en/pages/contenidos/investigacion/info_detallada/frutos_secos.htm

Hazelnut young orchard in Girona (North-East Spain).

EDITORIAL

Welcome dear readers,

It is a delight to be back, although in a different format. This time the issue is not printed on paper. From now on, the NUCIS Newsletter will be edited on-line. We have been forced to make this decision due to the economic crisis that has affected us for some years. But we are thrilled because we have seen that this newsletter, with all your efforts, is still very much alive. The last NUCIS (issue 15)

was published in December 2011, and now, two and a half years later we are presenting this new edition on-line. We are now able to provide colour images, another advantage of the digital format.

We are grateful to all contributors to this issue: to those who have written articles and those who have sent the reports of different symposia held over the last two years. This issue contains articles on hazelnut (2), almond (4), walnut (2) and pistachio (2). Contributions come from Chile (1), Italy (1), Spain (2), Morocco (3), Hungary (1), Tunisia (1) and Israel

(1). We always strive to present the scientific development in all nut crops worldwide and whenever possible we are committed to include a wide representation of countries.

Activities 2012-2013

During this period the FAO-CIHEAM Inter-regional Cooperative Research Network on Nuts has participated in several activities. Two International Meetings were organized in 2012: in March, the 8th International Congress on Hazelnut was held in Temuco, Chile; and in September, the 5th ISHS Chestnut International Sym-

Name change
