EUFRRIN Board Meeting – online, Wednesday, 18th of November, 2020

The International Conference of USAMV Bucharest

Agriculture for Life, Life for Agriculture

4-6th of June 2020

Situation of Romanian Agriculture and Fruit Sector in 2020

- The agricultural sector in Romania has reached a real crisis, the last-minute causes being the effects of the prolonged drought in the agricultural year 2020 and the COVID-19 pandemic.
- Romania risks registering the weakest agricultural production due to the severe drought installed since last autumn. Affected farmers are suffering heavy losses, but worse is the questioning of Romania's food security, which will greatly affect the national budget and economy.
- The value of the agricultural production from 2019 decreased by 3.8%, compared to the previous year.
Crop production decreased by 5.6%,
animal production decreased by 0.7%,
while agricultural services increased by 29.8%.
