

Apple and pear variety and rootstock evaluation at many different sites in the world

EUFRAIN Working group „Apple & Pear Variety & Rootstock Testing“:

serious and competent testing of new varieties and rootstocks with a proven unified descriptor list in a wide range of climate based on a fair-balanced experimental contract

Main goals

exchange of information and experience about new apple and pear varieties and rootstocks

First work

development of a proven descriptor list for apple and pear varieties

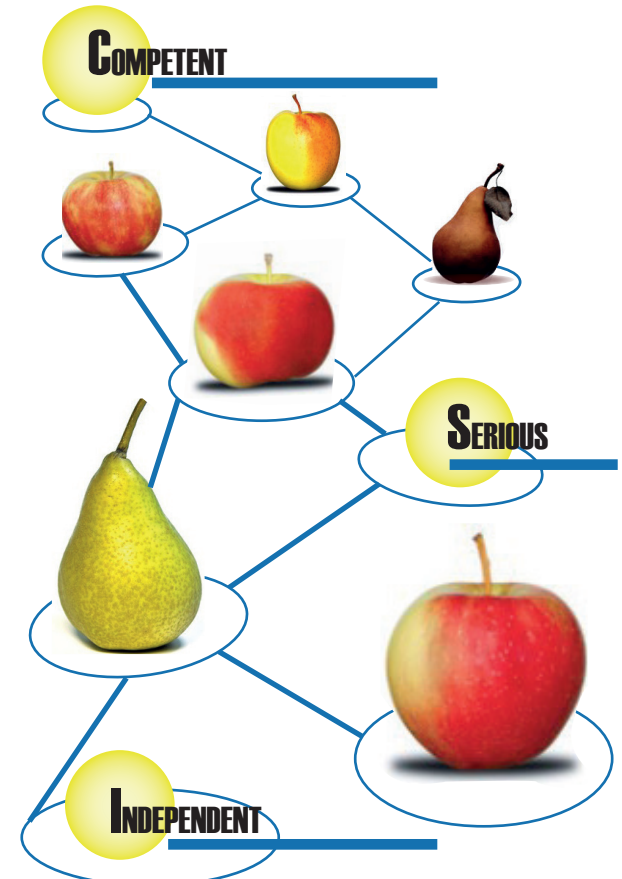

Recent work

standardized experimental contract for variety testing purposes
